

RDC Support for iOS 12 Beta

[Return to the Product Announcements and Release Notes Blog](#)

As Apple announces iOS 12 support, it is a great opportunity to remind our real device cloud customer our support for iOS 12 beta.

Private Cloud customers interested in upgrading one or more of their iOS 12 supported private devices should contact their CSM or the support team and request the upgrade immediately.

iOS 12 beta on RDC is supported for both XCUITest, Appium and Live Testing.

Happy Testing.

Asaf Saar
Director of Product Management
