

# Safari 12 on Mac 10.13

Return to the [Product Announcements and Release Notes Blog](#)

Dear Sauce User,

As we continue our mission to provide our users with the best coverage for testing applications, we are happy to announce that Sauce Labs now supports Safari 12 on Mac 10.13.

Java sample snippet:

```
DesiredCapabilities caps = DesiredCapabilities.safari();
caps.setCapability("platform", "macOS 10.13");
caps.setCapability("version", "12.0");
```

Our [Platform Configurator](#) has also been updated to reflect this newest version.

Happy Testing!  
Samantha Coffman  
Product Manager
