

# Appium 1.11.1: Now available on Android emulators!

We are happy to announce that Appium 1.11.1 is now available on Android emulators. This update fixes an issue introduced in React-Native version 0.57.2. The issue causes "Find Element" operation to fail while testing React-Native apps built for Android. Please refer to the following [bug report](#) for more details. Please set `appiumVersion` desired capability to "1.11.1" to test on Appium 1.11.1.
