

inclusions_library

- _best_practices
 - Best Practice: Avoid Dependencies between Tests to Run Tests in Parallel
 - Best Practice: Avoid External Test Dependencies
 - Best Practice: Keep Functional Tests Separate from Performance Tests
 - Best Practice: Don't Use Brittle Locators in Your Tests
 - Best Practice: Use Build IDs, Tags, and Names to Identify Your Tests
 - Best Practice: Use Explicit Waits
 - Best Practice: Use the Latest Version of Selenium Client Bindings
 - Best Practices: Use Small, Atomic, Autonomous Tests
 - Best Practice: Use Page Objects to Model Repeated Interactions and Elements
 - Best Practice: Have a Retry Strategy for Handling Flakes
 - Best Practice: Use Environment Variables for Authentication Credentials
 - Best Practice: Use Breakpoints to Diagnose Flaky Tests
 - Best Practice: Use New Accounts For Each Test
 - Best Practice: Avoid Leakage of Credentials
 - Best Practice: Be Aware of the Load on Your Servers
 - Best Practice: Imperative v. Declarative Testing Scenarios
 - Best Practice: Use Maven to Manage Project Dependencies
