

# iPad 6th generation simulator: Now available on Sauce Labs

We are excited to announce that iPad 6th generation simulator is now available on Sauce Labs. This simulator is only supported on iOS 12.

Here is an example of the desired capabilities in Python to run automated tests on the new simulator:

```
caps['deviceName'] = "iPad (6th generation) Simulator"  
caps['platformVersion'] = "12.0"  
caps['platformName'] = "iOS"
```

Our [Platform Configurator](#) has also been updated to reflect this newest version.

Happy Testing,  
Sauce Emulators and Simulators Team
