

Support for Chrome 68

Return to the [Product Announcements and Release Notes Blog](#)

As we continue our mission to provide our users with the best coverage for testing applications, we are happy to announce that Sauce Labs now supports Chrome 68 on Mac and Windows.

Here is an example of the desired capabilities in java:

```
DesiredCapabilities caps = DesiredCapabilities.chrome();
caps.setCapability("platform", "Windows 10");
caps.setCapability("version", "68.0");
```

Our [Platform Configurator](#) has also been updated to reflect this newest version.

Happy Testing,
Samantha Coffman
Product Manager
