

New versions of Jenkins (1.173), Bamboo(1.6.85), Team City (1.45) & VSTS (0.1.14) Plugins have been released

Over the past few days, we have released new versions of our CI Plugins(Sauce OnDemand Plugin for Jenkins v(1.173), Bamboo (1.6.85) & Team City (1.45) & VSTS (0.1.14)) that contain important bug fixes and feature updates.

Jenkins Plugin Updates

- Fix JENKINS-45892
- Add missing sauce username field in sent data
- Multithread stopjob Sauce API command as it was taking 11 seconds per request (used for the cleanup checkbox option)
- Check for new jobs when updating Sauce jobs data

Bamboo Plugin Updates

- Update deprecated Bamboo methods

Team City

- Added the support for automatically using the latest version of the Sauce Connect when executing builds

VSTS

- Resolved issues with Sauce Connect on a specific version of Windows.

If you have any questions please reach out to help@saucelabs.com

Thank You,

Sauce Labs Product Team.
