

All-The-Things-Digital

All-The-Things-Digital is a sample framework that demonstrate Sauce Labs capabilities across Desktop VMs, Emulators/Simulators, and Real Devices, for testing both mobile native and web Apps. All-The-Things-Digital provide you with a ready-made framework for different languages and testing frameworks that you can use to build or extend your solutions, or as a starting point for advanced Selenium and Appium automation development. Download it directly [from our GitHub repository](#).
