

Firefox 72: now available in Sauce Labs!

Return to the [Product Announcements and Release Notes Blog](#)

Hello Sauce user!

Sauce Labs is happy to announce that we now support Firefox 72, as we continue to provide our users with the best coverage for testing applications.

Here is an example of the desired capabilities in Java using Selenium and W3C:

Firefox 72

```
MutableCapabilities sauceOptions = new MutableCapabilities();

FirefoxOptions browserOptions = new FirefoxOptions();
browserOptions.setCapability("platformName", "Windows 10");
// Best to always use the latest version of the browser:
browserOptions.setCapability("browserVersion", "latest");

// Or you can name the browser explicitly:
// browserOptions.setCapability("browserVersion", "72.0");
browserOptions.setCapability("sauce:options", sauceOptions);
```

Happy Testing!

Our [Platform Configurator](#) has also been updated to reflect this newest version.
