

# Now Available: Custom Description in App Settings (Sauce Storage)

Happy New Year!

Sauce Labs has added a new field called "Description" in app settings under Live Testing > Mobile-App > Sauce Storage > App Settings

- In the app versions table, when you hover over the empty description field, you can see a pencil icon that indicates you can edit this description in the row
- Once you click inline, you will see a textbox where you can start typing your description
- This is useful when you want to make notes about each app version such as labels and comments for your team

Note: this new description field is limited to 255 characters

The screenshot displays the Sauce Labs interface for configuring an application. On the left is a navigation sidebar with categories like LIVE, AUTOMATED, INSIGHTS, SAUCE APPS, TUNNELS, and USAGE. The main content area shows the settings for 'SwagLabsMobileApp' (com.sauce labs.SwagLabsMobileApp). Under 'Default settings', various options are shown, such as Device Language (English), Device Orientation (Default), Proxy (Disabled), Instrumentation (Enabled), Image Injection (Enabled), System Alerts Delay (Disabled), Biometrics Interception (Enabled), and Group Folder Redirect (Disabled). Below the settings is a table of app versions.

FILE NAME	FILE ID	DESCRIPTION	VERS... ⓘ	BUILD ⓘ	TYPE	UPLOADED ⓘ
iOS.RealDevice.SauceLabs.Mobil...	996d27...	This is a new version	2.71	12	Ⓡ	22 days ago
